Career Objective

Professional and highly motivated Frontend & Web Developer looking to leverage solid expertise in modern web technologies including HTML, CSS, JavaScript, PHP, and Laravel framework to build responsive, high-performance web applications. Aiming to contribute technical skills to an innovative development team while continuously growing as a professional programmer.

Technical Skills

- **Core Programming & Scripting:** HTML, CSS, JavaScript (Vanilla JS), PHP
- **Frameworks & Libraries:** Laravel Framework
- **Database Management:** MySQL
- **Office Productivity Software:** Microsoft Word, Microsoft Excel
- **Design Concepts:** Responsive Web Design, Clean UI/UX Patterns

Academic & Technical Projects

1. HIIT Institute Official Website (Live Special Project)

Lead Web Developer / Project Developer

- Developed and launched the official main website for HIIT Institute, titled "AZ Media Website", managing both layout design and functional implementation.
- Engineered a dynamic, production-ready system utilizing modern frontend interfaces and backend structures.

2. Online Parking Management System

Academic Full-Stack Project

- Designed and built a comprehensive, multi-page web platform featuring functional Home, Booking, and Slot Allocation sections.

- Integrated secure booking mechanics with a relational database backend to handle real-time slot availability.

3. Mobile Shop E-Commerce Platform

Personal Web Project

- Developed a modern online retail application featuring organized product grids, functional catalog filtering, and robust order submission mechanisms.
- Applied custom style layouts to deliver a clean, commercial-grade shopping interface.
